Base:	23.75"
Support Plate:	33.5"
Weight:	280 lbs.

The Legacy Round Fire Table with its perfect curves, versatile style and timeless elegance will complete any design. Featuring a 7" smooth table top surface.

Architectural Pottery containers are hand made from Glass Fiber Reinforced Concrete, a durable lightweight fiberglass & cement mixture. Our containers are designed to last decades, but note these containers feature a beautiful hand applied surface finish that can be damaged from mis-handling. Treat and handle as an expensive piece of furniture.

Installation: Do not remove the plastic wrap until installation is completed. When transporting use a pallet jack, furniture dolly or a padded hand truck. It is recommended to use additional padding such as cardboard or a moving blanket between the finish surface and any metal or wood surface of the dolly. When placing the container, directly set the container without dragging or rolling the container. For accidental chips or scratches, touch up kits are available. For customer service questions or to request a touch up kit, please contact our sales office at 714.895.3359

Care: To clean, use clean damp cloth and rinse with water. You may also wipe surface using a light dish washing soap or baking soda diluted with water. Avoid using harsh solvents or abrasive soaps. To keep containers and finish looking like new, it is best to clean at least one time per month.

NOTE: Drainage **MUST** be provided in the bottom of each bowl.
